The Principal

All Affiliated colleges under KUHS

Sir,

Sub: - Connectivity to colleges under NME-ICT scheme – reg.

As you are aware that KUHS started in the Academic year 2010-11 has been using the latest technology in Services for the benefit of students and teachers of affiliated colleges. When Ministry of Human Resource Development (MHRD) announced the project under NME-ICT scheme, we have taken initiative to be part of it and we would like all our affiliated institutions also to become part of it so that the benefit envisaged pass on to the Students and Teachers.

National Mission on Education through Information and Communication and Technology (NME-ICT) is an ambitious project undertaken by the MHRD, Government of India with a view to seamlessly providing quality educational content based on UGC's Model Curricula absolutely free to all the eligible and willing learners in India. It has envisaged content and connectivity as the twin pedals for initiating and accelerating ICT-enabled Higher Education and sees its role in pushing the pedal of content development. Please refer to the mission document available at <http://www.sakshat.ac.in/asp/default.aspx>

KUHS needs all the affiliated institutions to be part a Virtual Private Network (VPN) for the smooth functioning of the University and for the benefits of the students and teachers. The future programs of the University will be making use of technology to the maximum and all the institutions affiliated to the University should be well equipped to harness the deliverables from KUHS in the most efficient way. In this aspect you are also required to take necessary steps for becoming a part of the VPN.

You can avail the offer under NME-ICT at the subsidized rate and make use of the high speed backbone for the benefits of the students and teachers in your college. It may also be noted that software for transmission of question papers from the University will be shifted to the more secure VPN in a short period of time.

BSNL has agreed all help for establishing the VPN. Hence you are requested to confirm whether you are willing to avail the subsidized fiber connection under the NME-ICT project. The confirmation may be mailed to the Registrar at registrarkuhs@gmail.com on or before 9th February, 2012. Shortly on receiving your confirmation, you will be called for a meeting on implementation of high speed connectivity at this office.

Yours faithfully
